Module 2: Patterns

Overview

Module 2 builds on previous experience with patterns. Students continue to develop skills in recognizing, describing, extending, and building both picture and number patterns. Special patterns such as multiples and factors are introduced and explored. In turn, these ideas are used to decide if numbers are composite or prime. Tables and diagrams are made to show patterns that can be used for solving problems. Mental mathematics and calculators, where appropriate, are used in the investigations.

Assessment

Following the Module Overview, the student is asked to begin work on the Numbers in the News project. The project is to be completed by the end of the module.

At the end of each of the first five lessons, the student is directed to complete an assignment in one of the two Assignment Booklets that accompany Module 2. The assignments will be graded by the teacher.

The module will be marked out of a total of 100 marks.

Pacing

The module has been designed so that students can work at their own pace. Each lesson, including the lesson assignment, will take the average student about one week to complete. The Challenge Activity in each lesson is optional.

You may wish to allow for time to review the basic facts. See the suggestions in Module 1.

Lesson 1: Describing Number Patterns

Overview

Lesson 1 focuses on identifying a variety of patterns. The activities include making tables to record, reveal, and extend patterns.

Special Requirements

You may gather the following materials for your student to use in this lesson:

- toothpicks

Sharing Time

Students are asked to discuss what they are learning with their home instructor three times in Lesson 1—at the end of Activity 1, at the end of Activity 2, and at the end of Activity 3.

Activity 1 Sharing Time

- The first number is 2. To get the next number add 1, to get the next number add 2, to get the next number add 3, and so on.

$$\begin{array}{ccccccc}
 2, & 3, & 5, & 8, & 12 \\
 \underbrace{2+1} & \underbrace{3+2} & \underbrace{5+3} & \underbrace{8+4} & \\
 = 3 & = 5 & = 8 & = 12
 \end{array}$$

- Add the first and second numbers to get the third number, add the second and third numbers to get the fourth number, add the third and fourth numbers to get the fifth number, and so on.

$$\begin{array}{ccccccc}
 2, & 3, & 5, & 8, & 13 \\
 \underbrace{2+3} & \underbrace{3+5} & \underbrace{5+8} & & \\
 = 5 & = 8 & = 13 & &
 \end{array}$$

Activity 2 Sharing Time

Practice and Homework Book, page 5, questions 1 to 3

1.

4 squares
13 toothpicks

| Number of Squares | Total Number of Toothpicks |
|-------------------|----------------------------|
|-------------------|----------------------------|

| | |
|----|----|
| 1 | 4 |
| 2 | 7 |
| 3 | 10 |
| 4 | 13 |
| 5 | 16 |
| 6 | 19 |
| 7 | 22 |
| 8 | 25 |
| 9 | 28 |
| 10 | 31 |
| 11 | 34 |
| 12 | 37 |
| 13 | 40 |

5 squares
16 toothpicks

6 squares
19 toothpicks

7 squares
22 toothpicks

2. The total number of toothpicks for each train is 3 more than the previous train.
3. Multiply the number of squares by 3 and add 1.

Activity 3 Sharing Time

Practice and Homework Book, page 11, questions 1 to 4
 The number pairs will vary. Following are sample answers.

1.

| Input | Output |
|-------|--------|
| 18 | 9 |
| 24 | 12 |
| 30 | 15 |
| 2 | 1 |
| 4 | 2 |
| 6 | 3 |
| 8 | 4 |
| 10 | 5 |

2.

| Input | Output |
|-------|--------|
| 24 | 12 |
| 32 | 14 |
| 48 | 18 |
| 4 | 7 |
| 8 | 8 |
| 12 | 9 |
| 16 | 10 |
| 20 | 11 |

Rule: Divide by 2.

Rule: Divide by 4 and add 6.

3.

| Input | Output |
|-------|--------|
| 6 | 34 |
| 9 | 49 |
| 10 | 54 |
| 1 | 9 |
| 2 | 14 |
| 3 | 19 |
| 4 | 24 |
| 5 | 29 |

4.

| Input | Output |
|-------|--------|
| 10 | 2 |
| 18 | 4 |
| 34 | 8 |
| 6 | 1 |
| 14 | 3 |
| 22 | 5 |
| 26 | 6 |
| 30 | 7 |

Rule: Multiply by 5 and add 4.

Rule: Subtract 2 and divide by 4.

Lesson 2: 2-D and 3-D Patterns

Overview

Lesson 2 focuses on patterns that grow in two and three dimensions. The activities include extending given patterns and building patterns from descriptions.

Special Requirements

You may gather the following materials for your student to use in this lesson:

- a set of base ten blocks
- a set of pattern blocks
- toothpicks

Sharing Time

Students are asked to discuss what they are learning with their home instructor once in Lesson 2—at the end of Activity 3.

Practice and Homework Book, page 3, questions 1 and 2

1. The total number of tiles is the length of the bridge plus 2.

| Length of Bridge | Number of Tiles |
|------------------|-----------------|
| 3 | 5 |
| 4 | 6 |
| 5 | 7 |
| 6 | 8 |
| 7 | 9 |
| 8 | 10 |
| 9 | 11 |
| 10 | 12 |

2. The total number of tiles is 3 times the number of tunnels plus 2.

| Number of Tunnels | Number of Tiles |
|-------------------|-----------------|
| 1 | 5 |
| 2 | 8 |
| 3 | 11 |
| 4 | 14 |
| 5 | 17 |
| 6 | 20 |
| 7 | 23 |
| 8 | 26 |

Lesson 3: Using Patterns to Solve Problems

Overview

Lesson 3 focuses on using patterns to solve problems. The activities include making tables and looking for patterns. Special charts such as Carroll diagrams and Venn diagrams are used to solve logic problems.

Sharing Time

Students are asked to discuss what they are learning with their home instructor once in Lesson 3—at the end of Activity 1.

Activity 1 Sharing Time

Practice and Homework Book, page 15, question 1

1. It will take 7 days until you have more than \$1000.

| Day | Amount (\$) |
|-----|-------------|
| 1 | 1 |
| 2 | 3 |
| 3 | 9 |
| 4 | 27 |
| 5 | 81 |
| 6 | 243 |
| 7 | 729 |
| | 1093 |

Teacher's Comments

Teacher's Signature

Home Instructor: Keep this sheet when it is returned to you as a record of the student's progress.

INSTRUCTIONS FOR SENDING IN THIS DISTANCE LEARNING ASSIGNMENT BOOKLET

When you register for distance learning courses, you are expected to send in Assignment Booklets for corrections regularly. Try to send each Assignment Booklet as soon as you have completed it. Before sending your Assignment Booklet, please check the following:

- Are all the assignments completed? If not, explain why.
- Has your work been reread to be sure the spelling and details are correct?
- Is the record form filled out and the correct module label attached?

MAILING

1. Postage Regulations

Do **not** enclose letters with Assignment Booklets.

Send all letters in a separate envelope.

2. Postage Rates

Take your Assignment Booklet to the post office and have it weighed. Attach enough postage and seal the envelope. Assignment Booklets will travel faster if correct postage is used and if they are in large envelopes that are no more than two centimetres thick.

FAXING

1. Assignment Booklets may be faxed. Contact your teacher for the fax number.
2. All faxing costs are the responsibility of the sender.

E-MAILING

Assignment Booklets may be e-mailed. Contact your teacher for the e-mail address.

ASSIGNMENT BOOKLET 2A

MATHEMATICS 5—MODULE 2: PATTERNS

Your mark on this module will be determined by how well you do your assignments in the Assignment Booklets.

Work slowly and carefully. If you are having difficulties, go back and review the appropriate lessons.

There are three lesson assignments in this Assignment Booklet. The total value of these assignments is 57 marks. The value of each assignment is stated in the left margin.

Be sure to proofread each assignment carefully.

14

Lesson 1 Assignment: Describing Number Patterns

Turn to page 16 in your textbook. Do questions 1 to 4 of Practise Your Skills.

2

Practise Your Skills, question 1

| Number of Hours | Money Earned |
|-----------------|--------------|
| 1 | \$7.00 |
| 2 | \$14.00 |
| 3 | \$21.00 |
| 4 | |
| 5 | |

2

Practise Your Skills, question 2

Show your work.

How much money would be earned?

• in 10 hours? _____

• in 15 hours? _____

(5)

Practise Your Skills, question 3

Write the next three numbers in the pattern. Explain the rule you used.

5, 9, 13, 17, _____, _____, _____

Rule: _____

(5)

Practise Your Skills, question 4

Write the next three numbers in the pattern. Explain the rule you used.

96, 84, 72, 60, _____, _____, _____

Rule: _____

21

Lesson 2 Assignment: 2-D and 3-D Patterns

1. Sharon is making flowers with the triangles and squares in a set of pattern blocks. The first three flower designs in the pattern are shown below.

Design
Number 1

Design
Number 2

Design
Number 3

(2)

a. Complete the following table to show the number of triangles and the number of squares for the first six flowers in the pattern.

| Design Number | 1 | 2 | 3 | 4 | 5 | 6 |
|---------------------|---|---|---|---|---|---|
| Number of Squares | | | | | | |
| Number of Triangles | | | | | | |

④ b. Describe at least two patterns you see in the numbers on your table.

② c. Write a description of Design Number 4 of this pattern.

② d. Find the number of triangles and the number of squares you will need to build the design number 10 of the flower pattern.

② e. What is the design number of the largest flower Sharon can build if she has 150 triangles and 125 squares?

Explain your thinking.

2. Abe made a growing pattern with square tiles and then drew pictures to show it. The first picture was a single square. The second picture had 2 rows and a total of 4 squares. The third picture had 3 rows and a total of 9 squares. The fourth picture had 4 rows and a total of 16 squares. He continued his pattern, making the next three shapes.

④ a. Draw pictures to show how Abe's first four pictures might look.

②

b. Complete the following T-table.

| Picture Number | Total Number of Squares |
|----------------|-------------------------|
| 1 | |
| 2 | |
| 3 | |
| 4 | |

① c. Describe the relationship between the picture number and the total number of squares in the picture.

② d. Using the relationship you see, extend the T-table in question 2.b. for Abe's next four shapes.

| Picture Number | Total Number of Squares |
|----------------|-------------------------|
| 5 | |
| 6 | |
| 7 | |
| 8 | |

22

Lesson 3 Assignment: Using Patterns to Solve Problems

1. The community centre charged \$1 to see a movie. On the first day, \$25 was collected. On the second day, \$17 more was collected than on the first day; at the end of the second day, the club had collected \$67 in total. On the third day, \$17 more was collected than on the second day. At the end of the third day, the club had collected \$124 in total. If the pattern continues, by the end of what day will the club have collected at least \$500?

2. a. Complete the table by extending it far enough for you to solve the problem.

| Day 1 | Amount Collected on That Day (\$) | Total Collected So Far (\$) |
|-------|-----------------------------------|-----------------------------|
| 1 | 25 | 25 |
| 2 | $25 + 17 = 42$ | $25 + 42 = 67$ |
| 3 | $42 + 17 = 59$ | $67 + 59 = 126$ |
| | | |
| | | |
| | | |
| | | |

1. b. Describe how the amount collected each day increases.

1

c. Describe how the total amount collected increases.

1

d. How many days did it take to collect at least \$500? What was the exact amount collected at that point?

2. Four friends, Dora, Charlie, Reg, and Tania, each have a different pet: a cat, a rabbit, a dog, or a turtle. Use the following clues to match each friend with his or her pet.

- No one has a pet that starts with the same letter as his or her name.
- Dora is allergic to cats.
- Tania doesn't have a rabbit or a dog.
- Charlie has a dog or a turtle.
- Reg's pet is fluffy.

③

a. Use logical reasoning and complete the following Carroll diagram matching the friends with their pets. Write **yes** in the cell that matches that person to that pet. Write **no** in the cells that do not match that person to that pet.

| | Dora | Charlie | Reg | Tania |
|--------|------|---------|-----|-------|
| Cat | | | | |
| Rabbit | | | | |
| Dog | | | | |
| Turtle | | | | |

①

b. Tell what kind of pet each person has.

3. When a group of friends went out for lunch, 8 ordered soup, 7 ordered sandwiches, and 9 ordered milk. Three ordered only soup, 2 ordered only milk and soup, 3 ordered only a sandwich and milk, and 2 ordered all three items.

② a. Use logical reasoning to complete the following Venn diagram.

① b. How many people ordered only milk?

① c. How many people ordered only soup and a sandwich?

① d. How many people ordered only a sandwich?

① e. How many people didn't order milk?

① f. What is the total number of friends that went out for lunch?

⑥ 4. How many squares are on a 5 by 5 geoboard if you connect the dots using only horizontal and vertical lines? Use the dot paper provided to find all the squares. Then complete the following table on the next page.

| Size of Squares | Number of Squares That Size |
|---|-----------------------------|
|  | |
|  | |
|  | |
|  | |

Total _____
